THE 1600 PROJECT · ELA FOUNDATIONS

*Week 1 of 4*

# Test Basics

How the Reading and Writing section works, and the habits that stop easy points from slipping away.

## You will be able to

1. Describe how the Reading and Writing section is built and timed.
2. Use five habits on every question, from reading the question first to never leaving a blank.
3. Find the fastest, most learnable points in each module.

KNOW THE TEST

# The section at a glance

**2**
modules

**27**
questions per module

**32**
minutes per module

**~70s**
per question, on average

**No penalty for guessing.** A blank is always worth zero; a guess might be worth a point.

**One short passage per question.** No long reading passages: every question stands on its own.

THE BIG IDEA

# Module 1 decides how hard Module 2 will be.

Strong accuracy in Module 1 unlocks the harder second module, which is where higher scores live. A careless miss on an easy question costs more than it looks.

INSIDE EVERY MODULE

# Where the easy points live

1 · READING-HEAVY

### Craft and Structure

Word meaning, text structure, paired passages

2 · READING-HEAVY

### Information and Ideas

Main idea, evidence, inference, graphs

3 · FAST, RULES-BASED

### Standard English Conventions

Punctuation and grammar (Weeks 2–3)

4 · FAST, FORMULAIC

### Expression of Ideas

Transitions and notes questions (Week 4)

Blocks 3 and 4 add up to nearly **half** the section (about 26% + 20%), and they reward rules you can learn in weeks. You can move freely within a module, so some students do this block first.

**Recommendation:** Start with Standard English Conventions and Expression of Ideas.

EVERY QUESTION, EVERY TIME

# Five habits

**1**

### Question first

Know your job before you read the passage.

**2**

### Predict

Answer in your own words before looking at the choices.

**3**

### Eliminate

Cross out wrong choices with the answer eliminator tool.

**4**

### Mark and move

Stuck past 90 seconds? Mark for Review and come back later.

**5**

### Never blank

Guess on anything left when time is short. There's no penalty.

ELIMINATION

# How wrong answers are built

### Too extreme

Words like “always,” “only,” or “completely” when the passage is careful.

### Off-topic

Brings in an idea the passage never discusses.

### True but doesn't answer

An accurate detail from the passage that doesn't do the question's job.

### Half right

Starts correctly, then adds one wrong word or claim. One bad part makes it wrong.

TRY THE HABITS

# Bees and electric fields

Many people assume that bumblebees find flowers mainly by color. However, researchers found that bees can also detect the weak electric fields surrounding flowers, and that bees learned to prefer flowers with distinctive electric patterns even when the flowers' colors were identical.

**Which choice best states the main idea of the text?**

**A** Bees can sense flowers' electric fields and use them to choose flowers.

**B** Bees cannot see the colors of flowers.

**C** Electric fields are the only signal bees use to find flowers.

**D** Flowers change color to attract more bees.

ANSWER AND EXPLANATION

# The answer is A

MY PREDICTION

*“Bees also use electric fields.”*

**A** **Bees can sense flowers' electric fields and use them to choose flowers.**

A matches the prediction. Eliminating the other three takes seconds once you know the wrong-answer families.

## Why the others are wrong

**B** **Too extreme.** The text never says bees can't see color.

**C** **Too extreme.** “Only” goes past the word “also.”

**D** **Off-topic.** Flowers changing color is never discussed.

PACING

# A plan for one module

**30–45s**
for grammar, punctuation, and transitions

**~16 min**
left when you reach question 14: you're on pace

**2 min**
is the most any single question gets

### First pass

Answer everything you can. Mark anything over 90 seconds and move on.

### Second pass

Return to marked questions. With a minute left, fill every blank.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 6 mixed questions

For each one, say the question's job out loud and predict before anyone looks at the choices.

INDEPENDENT · TIMED

### Half a module: 13 questions, 16 minutes

Use all five habits. Leave nothing blank.

EXIT TICKET

### One question, shown in full

Write your prediction, the letters you eliminated, and the wrong-answer family each one belongs to.

THE 1600 PROJECT · ELA FOUNDATIONS

*Week 2 of 4*

# Punctuation Points

Sentence boundaries: the most rule-based questions on the whole test.

## You will be able to

1. Tell a complete sentence from a fragment.
2. Join two sentences the four legal ways, and spot a comma splice.
3. Know where punctuation is never allowed.

THE BIG IDEA · THE SPLIT TEST

# Is there a complete sentence on *each side*?

Put your finger on the punctuation. Check the left side, then the right side. Nearly every punctuation question comes down to this.

THE BUILDING BLOCK

# Subject + verb + complete thought

### COMPLETE SENTENCES

The bridge opened in 1937.

Researchers measured the tides.

### FRAGMENTS (NOT SENTENCES)

Because the bridge opened in 1937 (starts with a dependent word)

Measuring the tides for a decade (no subject or main verb)

**Dependent words turn a sentence into a fragment**

because · although · when · while · which · if · since

THE CORE RULE

# Four legal ways to join two sentences

### Period

The storm passed**.** The roads reopened.

### Semicolon

The storm passed**;** the roads reopened.

### Comma + FANBOYS

The storm passed**, and** the roads reopened.

for, and, nor, but, or, yet, so

### Colon

The storm caused one problem**:** the roads flooded.

when the second part explains the first

**NEVER: COMMA ALONE**

The storm passed, the roads reopened. ← comma splice, always wrong

EXTRA INFORMATION

# Pairs must match

**CORRECT · COMMA WITH COMMA**

The violinist, who began playing at age four, performed in Vienna.

**WRONG · DASH WITH COMMA**

The violinist — who began playing at age four, performed in Vienna.

**Removal test:** cover the middle part. If the sentence still works, it's extra information and needs a matching pair.

**A single dash** can work like a colon: a complete sentence before it, an explanation after.

KEEP THESE CLEAN

# No-punctuation zones

### Between a subject and its verb

Wrong: The results of the survey**,** surprised everyone.

### Between a verb and its object

Wrong: The team found**,** a new species.

### Between a preposition and its object

Wrong: We met in**,** the library.

### Before a “that” clause

Wrong: She argued**,** that the plan would fail.

When in doubt between “some punctuation” and “none,” check these four zones first.

QUICK DRILL · 40 SECONDS EACH

# Run the Split Test

**1** Maya finished the _____ she began writing her report.

**A** experiment, **B** experiment;
**C** experiment, then **D** experiment then

**2** The novel's main _____ a retired sailor, narrates the story.

**A** character, **B** character
**C** character — **D** character;

**3** The recipe calls for three _____ flour, sugar, and butter.

**A** ingredients: **B** ingredients,
**C** ingredients; **D** ingredients

ANSWERS

# B, A, A

| # | Answer | Why |
|---|---|---|
| 1 | **B · semicolon** | Both sides are complete. A is a comma splice; “then” isn't FANBOYS, so C is still a splice; D is a run-on. |
| 2 | **A · comma** | “a retired sailor” is extra information closed by a comma, so it must open with a comma too. |
| 3 | **A · colon** | A complete sentence comes before, and a list explaining it comes after. |

WATCH OUT

# Common traps

TRAP 1

## It sounds fine

Comma splices sound natural out loud. Trust the Split Test, not your ear.

TRAP 2

## Fake joiners

“However,” “then,” and “therefore” aren't FANBOYS. Between two sentences they need a semicolon or period first.

TRAP 3

## Mismatched pairs

A dash opens extra information and a comma closes it.

TRAP 4

## Extra commas

A comma dropped into a no-punctuation zone, often between subject and verb.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 8 boundary questions

Say the Split Test out loud for every choice: “left complete? right complete?”

INDEPENDENT · TIMED

### 12 questions, ~40 seconds each

Then punctuate 5 sentences from scratch, with no choices to lean on.

EXIT TICKET

### Three sentences

Label each one correct, run-on, or fragment, and fix the broken ones.

THE 1600 PROJECT · ELA FOUNDATIONS

*Week 3 of 4*

# Grammar Matching

Agreement, tense, and form: find what the word has to match.

## You will be able to

1. Find a verb's true subject, even with a phrase in between.
2. Match pronouns and verb tenses to the rest of the sentence.
3. Use apostrophes and opening phrases correctly.

THE BIG IDEA

# Every grammar question is a *matching* game.

Find what the word has to match, check that it does, and ignore what just “sounds right.”

RULE 1

# Subject–verb agreement

**Cross out the middle.** Ignore “of …” phrases and anything between commas, then match the verb to what's left.

> The **list** [of required books] **is** long.
>
> The **players**, along with their coach, **are** ready.

### Tricky subjects

| | |
|---|---|
| each, every, either, neither, everyone | **singular** |
| *The* number of … | **singular** |
| *A* number of … | **plural** |
| Two subjects joined by “and” | **plural** |

RULE 2

# Pronouns match their nouns

### Match the number

One thing → **it / its**. More than one → **they / their**.

The birds left **their** nests.

### Groups count as one

A company, team, or committee usually takes **it / its** on the SAT.

The committee released **its** report.

### Be clear

If “it” or “they” could point to two different nouns, pick the choice that names the noun.

RULE 3

# Verb tense follows the timeline

| Clue words in the sentence | Tense | Example |
|---|---|---|
| In 1905 · last year · centuries ago | **Past** | discovered |
| currently · today · now | **Present** | discovers |
| since 2010 · so far · for decades (still true) | **Present perfect** | has discovered |
| by the time · before another past event | **Past perfect** | had discovered |

No clue words? **Match the tense of the other verbs** in the sentence and the sentences around it.

RULES 4 AND 5

# Apostrophes and opening phrases

## Apostrophes

**it's** = it is · **its** = belongs to it

**-'s** = one owner · **-s'** = many owners

the student's locker (one student)
the students' lockers (many students)

## Opening phrases

An opening description must describe the noun **right after the comma**.

Right: Walking to school, **the student** saw a fox.
Wrong: Walking to school, a fox was seen.

QUICK DRILL · ONE PER RULE

# Find the match

**1** The collection of old maps _____ displayed in the library's main hall.

**A** are · **B** is · **C** were · **D** have been

**2** After months of testing, the company announced that _____ new battery lasts twice as long.

**A** their · **B** its · **C** it's · **D** they're

**3** In 1869, the first transcontinental railroad in the United States _____ completed.

**A** is · **B** will be · **C** was · **D** has been

**4** Having studied the data for weeks, _____

**A** the conclusion was finally clear to the scientist.
**B** the scientist finally reached a clear conclusion.
**C** a clear conclusion was finally reached.
**D** it was finally clear to the scientist.

ANSWERS

# B, B, C, B

| # | Answer | Rule | Why |
|---|---|---|---|
| 1 | **B · is** | Subject–verb | Cross out “of old maps”: the subject is “collection,” which is singular. |
| 2 | **B · its** | Pronoun | One company owns the battery. “It's” means “it is.” |
| 3 | **C · was** | Tense | “In 1869” is a finished past date. |
| 4 | **B** | Opening phrase | The scientist did the studying, so “the scientist” must come right after the comma. |

WATCH OUT

# Common traps

TRAP 1

## Nearest noun

Matching the verb to the noun right next to it instead of the real subject.

TRAP 2

## “Their” for one group

We say it in conversation, but the SAT wants “its” for one company or team.

TRAP 3

## its vs. it's

Test it: if “it is” doesn't fit, the answer is “its.”

TRAP 4

## Random tense shift

A choice that jumps to a new tense when the timeline hasn't changed.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 10 mixed items, two per rule

Before answering, say which rule it is and what the word has to match.

INDEPENDENT · TIMED

### 12 questions, ~40 seconds each

Includes 3–4 punctuation questions from Week 2 for review.

EXIT TICKET

### Four sentences, one error each

Name the rule each one breaks and fix it.

THE 1600 PROJECT · ELA FOUNDATIONS

*Week 4 of 4*

# Transitions and Notes

The last questions in every module: fast, formulaic, and very learnable.

## You will be able to

1. Name how two sentences relate before choosing a transition.
2. Turn a notes question's goal into a quick checklist.
3. Answer each of these questions in under a minute.

THE BIG IDEA

# These questions test *logic and goals*, not reading speed.

Transitions ask how two sentences connect. Notes questions ask whether a sentence does what the goal says. Neither needs you to understand every word.

TRANSITIONS

# Cover, Connect, Choose

**1 Cover** the blank. Read the sentence before and after.

**2 Connect:** say the link in your words (“the second is a result”).

**3 Choose** from that group of words.

### Contrast

however, nevertheless, by contrast, still

### Cause and effect

therefore, as a result, thus, consequently

### Addition

moreover, furthermore, additionally, similarly

### Example

for example, for instance, specifically

**Shortcut:** if two choices mean the same thing (like “therefore” and “thus”), in most cases, neither is the answer.

WORKED EXAMPLE · TRANSITIONS

# Octopus disguises

Octopuses can change color in less than a second. _____, some species can also change the texture of their skin to look like rocks or coral.

**Which choice completes the text with the most logical transition?**

**A** However

**B** Therefore

**C** Additionally

**D** For example

ANSWER AND EXPLANATION

# The answer is C

**C** **Additionally** · addition

**Connect:** the second sentence adds a second disguise ability (“also”). That's addition, not contrast or cause.

## Why the others are wrong

**A** “However” signals a contrast, but nothing is contradicted.

**B** Changing color doesn't *cause* texture changes.

**D** Texture isn't an example of changing color; it's a new ability.

NOTES QUESTIONS

# Read the goal first, then make a checklist

| If the goal says… | The answer must… |
|---|---|
| **“emphasize a similarity”** | name both things + a word like *both, also, like* |
| **“emphasize a difference”** | name both things + a word like *while, whereas, unlike* |
| **“introduce X to a new audience”** | explain what X is, not just name it |
| **“present the findings”** | state the result, not the method |
| **“explain the purpose”** | say why it was done (often “to …”) |

Every choice is usually **true** to the notes. Only one does the job the goal asks for.

WORKED EXAMPLE · NOTES

# Two deserts

### A STUDENT'S NOTES

- The Atacama Desert in Chile is one of the driest places on Earth.
- Some weather stations there have never recorded rain.
- The Sahara, the largest hot desert, covers about 9 million square kilometers.
- The Atacama covers about 105,000 square kilometers.

**The student wants to emphasize a difference in size between the two deserts. Which choice most effectively uses relevant information from the notes to accomplish this goal?**

**A** The Atacama is one of the driest places on Earth, and some of its weather stations have never recorded rain.

**B** The Sahara covers about 9 million square kilometers, while the Atacama covers only about 105,000.

**C** Both the Sahara and the Atacama are deserts.

**D** The Sahara is the largest hot desert on Earth.

ANSWER AND EXPLANATION

# The answer is B

### Checklist: a difference in *size*

**Yes** Names both deserts

**Yes** Uses a contrast word (“while”)

**Yes** Compares their sizes

Only **B** passes all three checks.

### Why the others are wrong

**A** About dryness, and only one desert.

**C** A similarity, not a difference.

**D** One desert, no comparison.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 4 transitions + 4 notes questions

Say the relationship or the checklist out loud before anyone reads the choices.

INDEPENDENT · SPEED DRILL

### 16 questions in 12 minutes

8 transitions and 8 notes questions, under 45 seconds each.

NEXT STEP

### Take a full practice test

Use a Bluebook practice test, then log every miss by question type and trap.

FOUR WEEKS, ONE CHECKLIST

# Your easy-points checklist

### WEEK 1 · HABITS

Question first, predict, eliminate, mark and move, never blank.

### WEEK 2 · PUNCTUATION

Complete sentence on each side? Then check the four legal joins.

### WEEK 3 · GRAMMAR

Find what the word has to match. Cross out the middle.

### WEEK 4 · TRANSITIONS AND NOTES

Name the relationship. Turn the goal into a checklist.

These skills cover the Conventions and Expression of Ideas questions: nearly half of every Reading and Writing module.

CATEGORY 1 · INFORMATION AND IDEAS

*Lesson 1.1*

# Command of Evidence: Textual

**Weeks 3–4**
Central ideas and details · Using textual evidence · Drawing inferences

## You will be able to

1. State the main idea of a short passage in your own words before looking at the choices.
2. Pick the quotation or finding that most directly supports a given claim.
3. Complete a passage with the inference the text logically requires, and nothing more.

THE BIG IDEA

# The correct answer is always provable from the text.

If you can't point to the line that proves it, it is not the answer.

STRATEGY

# Predict, Prove, Pick

1

### Read the question

Read the question first so you know what job you are reading for.

2

### Predict

Read the passage and predict the answer in five words or fewer.

3

### Prove

Underline the sentence your prediction comes from.

4

### Pick

Pick the choice that matches. Eliminate anything too broad, too narrow, or that adds an idea the text never states.

TWO QUESTION TYPES

# Evidence and inference

### EVIDENCE QUESTIONS

*“Which finding, if true, would most directly support the claim?”*

Restate the claim as a simple **cause** or **comparison** first. The right answer matches every part of the claim, not just its topic.

### INFERENCE QUESTIONS

*“Which choice most logically completes the text?”*

The blank is usually the conclusion of the passage's reasoning. Ask: **given everything before the blank, what must be true?**

WORKED EXAMPLE

# Parrotfish and reef recovery

Marine biologist Ana Ruiz compared coral reefs in Belize after a bleaching event. Reefs with large parrotfish populations regained coral cover faster than reefs where parrotfish had been overfished. Ruiz argues that parrotfish speed recovery by grazing on algae that would otherwise crowd out young coral.

**Which finding, if true, would most directly support Ruiz's argument?**

**A** Parrotfish are more common on reefs in warmer water.

**B** Reefs where algae were removed by hand recovered about as fast as reefs with many parrotfish.

**C** Some reefs without parrotfish still recovered within ten years.

**D** Parrotfish also eat small amounts of coral.

ANSWER AND EXPLANATION

# The answer is B

**B** **Reefs where algae were removed by hand recovered about as fast as reefs with many parrotfish.**

Ruiz's claim has a **mechanism**: parrotfish help *because they remove algae*. B shows that removing algae by another means produces the same result, which supports that mechanism.

## Why the others are wrong

**A** About where parrotfish live, not how they help reefs recover.

**C** Weakens the claim slightly instead of supporting it.

**D** Unrelated to recovery speed.

WATCH OUT

# Common traps

TRAP 1

## True but not the point

A real detail from the passage, offered as the main idea.

TRAP 2

## Topic match only

An evidence choice about the right subject that doesn't address the claim's cause or comparison.

TRAP 3

## Over-inference

A completion that sounds smart but goes beyond what the text forces.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 4–6 short passages

Main-idea, evidence, and inference questions. Write your five-word prediction before you look at the choices, and be ready for: **“Where's your proof?”**

INDEPENDENT · TIMED

### 8–10 questions, ~70 s each

That's digital SAT pace. Mark any question where you could not underline proof, and review those first.

EXIT TICKET

### One inference question

Write the answer letter **and** the exact phrase from the passage that proves it.

CATEGORY 1 · INFORMATION AND IDEAS

*Lesson 1.2*

# Vocabulary in Context

**Weeks 5–6**
Words in context · Precise word choice · Connotation versus denotation

## You will be able to

1. Determine a word's meaning from the surrounding sentence, even when the word is familiar in a different sense.
2. Choose the most precise word to fill a blank based on the logic of the passage.
3. Tell apart words with similar dictionary meanings but a different tone (connotation).

THE BIG IDEA

# The SAT tests what a word means *in this sentence*, not its most common meaning.

Learn words inside passages, never as isolated lists.

STRATEGY

# Cover, Fill, Match

**1**

### Cover

Cover the answer choices so they can't steer you.

**2**

### Fill

Fill the blank (or replace the underlined word) with your own simple word, using clues in the sentence.

**3**

### Match

Match your word to the choices. Then plug the winner back in and read the full sentence.

**Clues to look for**

- **Contrast** · however, although
- **Cause** · because, so
- **Restatement** · after a colon or dash

CONNOTATION VS. DENOTATION

# Same meaning, different attitude

**Denotation**

The dictionary meaning of a word.

**Connotation**

The feeling or judgment a word carries.

| frugal | thrifty | economical | cheap | stingy |
|---|---|---|---|---|

← More approving

All mean “careful with money”

More critical →

WORD WALL STARTERS

# High-frequency SAT words

### qualify

To limit a claim or add conditions to it.

Not just “to be eligible”

### undermine

To weaken, often gradually or indirectly.

### novel

New and original.

Not “a book”

### arbitrary

Based on random choice or whim, not on reason.

### tenuous

Weak or thin; easily broken, as in “a tenuous link.”

Add every new word to the wall **with the sentence you found it in**. Context is how the SAT tests it.

WORKED EXAMPLE

# The novelist's spare prose

Although critics initially dismissed the novelist's spare prose as lifeless, later readers found its restraint _____, arguing that what the author left unsaid carried the story's emotional weight.

**Which choice completes the text with the most logical and precise word?**

**A** monotonous

**B** powerful

**C** excessive

**D** careless

ANSWER AND EXPLANATION

# The answer is B

**B** powerful

**“Although”** signals that later readers *disagreed* with “lifeless.” The second half says the unsaid parts “carried the story's emotional weight,” so the blank must be **positive and strong**.

The clue that told me: “Although.”

## Why the others are wrong

**A** “Monotonous” agrees with the critics, not the later readers.

**C** “Excessive” contradicts “spare” and “restraint.”

**D** “Careless” also agrees with the critics.

WATCH OUT

# Common traps

TRAP 1

## Familiar meaning

Reading “novel” as *a book* when the sentence needs *new*.

TRAP 2

## Right meaning, wrong tone

Choosing “stubborn” when the passage admires the person (“determined”).

TRAP 3

## Skipping the plug-back

A choice that matches your prediction but doesn't fit the sentence grammatically.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 6–8 Words in Context items

Circle the clue word that decided each answer. Add new words to the class word wall with their sentence.

INDEPENDENT · TIMED

### 10 questions + a connotation sort

Then take 3 minutes to place 8 words on a negative-to-positive line.

EXIT TICKET

### One vocabulary question

Plus one sentence: **“The clue that told me was _____.”**

CATEGORY 1 · INFORMATION AND IDEAS

*Lesson 1.3*

# Command of Evidence: Quantitative

**Weeks 21–22 · capstone reading skill**
Interpreting graphs, tables, and charts embedded in reading passages

## You will be able to

1. Read a graph's title, axes, units, and legend before reading any data.
2. Find the one data point or trend that completes or supports a claim in the passage.
3. Reject choices that are accurate about the graphic but don't match the claim.

THE BIG IDEA

# The right answer is *true according to the data* and does the job the passage asks for.

These questions need both the text and the graphic. “True” alone is not enough.

STRATEGY

# Claim first, data second

**1**

### Find the claim

Read the text and underline the exact claim to be supported or completed.

**2**

### Read the graphic

Title, axes, units, legend. Say out loud what one bar, line, or row represents.

**3**

### Match variables

Find the part of the graphic with the claim's variables: the same groups, the same years.

**4**

### Eliminate twice

First cut choices that are false per the data, then choices that are true but off-claim.

WORKED EXAMPLE

# Library program attendance

A student researched how a city's library programs changed. The table shows average weekly attendance.

| Program | 2019 | 2023 |
|---|---|---|
| Story time | 120 | 95 |
| Coding club | 30 | 85 |
| Book club | 40 | 42 |

The student claims that the library's newer technology programs have grown faster than its traditional programs.

**Which choice best uses data from the table to support this claim?**

**A** Story time had the highest attendance in 2019.

**B** Coding club attendance nearly tripled from 2019 to 2023, while book club attendance barely changed.

**C** Book club attendance increased from 2019 to 2023.

**D** Total attendance was higher in 2019 than in 2023.

ANSWER AND EXPLANATION

# The answer is B

**B** **Coding club nearly tripled (30 → 85), while book club barely changed (40 → 42).**

The claim **compares** the growth of technology programs with traditional ones. Only B compares the two kinds.

## Why the others are wrong

**A** **True but off-claim.** Accurate, but it makes no comparison of growth.

**C** **True but off-claim.** Mentions only a traditional program.

**D** **False per the data.** Total attendance rose from 190 to 222.

WATCH OUT

# Common traps

TRAP 1

## Accurate but irrelevant

A correct statement about the data, but for the wrong groups or years.

TRAP 2

## Misreading units

Percentages versus counts; thousands versus millions.

TRAP 3

## Ignoring half the claim

The claim compares two things, but the choice mentions only one.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 4–5 passage + graphic items

Before each one, say what the x-axis, the y-axis, and one data point mean. Expect a bar chart, a line graph, and a table.

INDEPENDENT · TIMED

### 6–8 quantitative questions

Label every wrong choice as **“false per data”** or **“true but off-claim.”**

EXIT TICKET

### One quantitative evidence question

Plus one sentence naming the claim's two variables.

CATEGORY 2 · CRAFT AND STRUCTURE

*Lesson 2.1*

# Words in Context: Rhetorical Use

**Weeks 5–6 · alongside Lesson 1.2**
Explaining *why* an author chose a word or phrase, not just what it means

## You will be able to

1. Explain the effect of a word choice on tone, emphasis, or the reader's view of a subject.
2. Answer “the author's use of X primarily serves to…” questions by naming the function first.
3. Distinguish a word's meaning from its rhetorical job.

THE BIG IDEA

# Why did the author pick *this* word over a plainer one?

LESSON 1.2 ASKED

What does this word **mean**?

THIS LESSON ASKS

What does this word **do**?

STRATEGY

# The Swap Test

**1**

### Swap

Replace the author's word with a neutral synonym: “stormed out” becomes “left.”

**2**

### Ask what was lost

Emotion? Intensity? Judgment? Humor? Precision?

**3**

### Name the function

That loss *is* the function. Find the choice that names it.

**Function verbs to use**

emphasize · contrast · criticize · praise · illustrate · qualify · dramatize · undercut

WORKED EXAMPLE

# The council's parking plan

The council's new parking plan, which took two years to draft, was unveiled to a room of residents who had stopped caring long ago. Within minutes, the plan was quietly **shelved**.

**The use of the word “shelved” mainly serves to:**

**A** suggest that the plan was physically stored in a library.

**B** emphasize how quickly and casually two years of work was set aside.

**C** show that residents strongly opposed the plan.

**D** indicate that the plan would be revisited soon.

ANSWER AND EXPLANATION

# The answer is B

**B** **Emphasize how quickly and casually two years of work was set aside.**

**Swap** “shelved” for “rejected”: you lose the sense of something being put away without fuss. Paired with “quietly” and “within minutes,” it stresses how little the effort mattered.

## Why the others are wrong

**A** Reads figurative language literally.

**C** Contradicts “stopped caring”: residents weren't opposed, they were indifferent.

**D** Nothing in the text supports it.

WATCH OUT

# Common traps

TRAP 1

## Meaning instead of function

A choice that defines the word but doesn't say what it *does*.

TRAP 2

## Too strong

“Ridicule” when the tone is only mildly skeptical.

TRAP 3

## Literal reading

Taking figurative language at face value, like choice A's library shelf.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### Swap Test on 5–6 words

Underlined words from literary and argumentative passages. Write the function verb before you look at the choices.

INDEPENDENT · TIMED

### 8 effect + 4 vocabulary questions

Mixed on purpose: practice telling “what it means” apart from “what it does.”

EXIT TICKET

### One underlined word

Write the neutral swap and the one-word function.

CATEGORY 2 · CRAFT AND STRUCTURE

*Lesson 2.2*

# Text Structure and Purpose

**Weeks 7–8**
Author's purpose · Structure of a passage · Function of a sentence

## You will be able to

1. Map a passage sentence by sentence using function labels.
2. Identify the main purpose of a whole passage.
3. Identify the role of one underlined sentence within the passage.

THE BIG IDEA

# Every sentence has a job.

Purpose and structure questions ask you to **name the job**, not summarize the content.

STRATEGY

# Label the Jobs

## 1

### Label

Write a one-word job next to each sentence.

## 2

### Whole passage

Read your labels top to bottom. The pattern (e.g. background, problem, solution) is the purpose.

## 3

### One sentence

Check that sentence's label and how it relates to the sentences around it.

## 4

### Match the verb

Describe, argue, explain, challenge, compare: pick the answer whose verb fits.

**Job labels**

claim · background · example · contrast · concession · evidence · conclusion

WORKED EXAMPLE

# Social octopuses

**(1)** For decades, scientists assumed that octopuses, as solitary animals, had little need for social intelligence. **(2)** But researchers in Australia recently observed gloomy octopuses living in dense groups, signaling to one another and even evicting rivals from dens. **(3)** These findings suggest that complex social behavior may evolve even in species once thought to live alone.

**Which choice best describes the overall structure of the text?**

**A** It presents an assumption, describes observations that challenge it, and states a conclusion drawn from them.

**B** It describes an experiment and then explains its flawed method.

**C** It compares two species of octopus.

**D** It lists several examples of solitary animals.

ANSWER AND EXPLANATION

# The answer is A

## The label map

**(1)** **Background assumption**

**(2)** **Contrasting evidence** (“But…”)

**(3)** **Conclusion**

**A** matches all three parts: assumption → observations that challenge it → conclusion.

## Why the others are wrong

**B** Invents a flaw. The text never criticizes the method.

**C** Misdescribes the content: only one species appears.

**D** Misdescribes the content: there is no list of solitary animals.

WATCH OUT

# Common traps

TRAP 1

### Summary instead of purpose

A choice that restates the content but has the wrong verb.

TRAP 2

### One-part match

A choice that describes only the first half of the passage.

TRAP 3

### Wrong attitude

“Argue” when the author only “describes.”

PRACTICE

# Put it to work

GUIDED · TOGETHER

### Label 4 passages

Label the jobs as a group, compare labels with a partner, then answer the purpose and structure questions.

INDEPENDENT · TIMED

### 8 structure and purpose questions

Write your labels in the margin **before** answering. Every time.

EXIT TICKET

### One short passage

Write the label sequence and the passage's purpose in one sentence.

CATEGORY 2 · CRAFT AND STRUCTURE

*Lesson 2.3*

# Cross-Text Connections

**Weeks 7–8 · alongside Lesson 2.2**

Comparing and synthesizing two related passages

## You will be able to

1. State each text's position in one sentence.
2. Predict how the author of Text 2 would respond to a specific claim in Text 1.
3. Identify points of agreement, disagreement, and qualification between texts.

THE BIG IDEA

# Cross-Text questions almost always ask how one author would *react* to the other.

You can't answer until you know both positions precisely.

STRATEGY

# Two Sentences, One Relationship

**1**

### Text 1

After reading it, write its main claim in one sentence.

**2**

### Text 2

After reading it, write its main claim in one sentence.

**3**

### Relationship

Name how the two connect, using one of the four words below.

**4**

### Match

Pick the choice that fits both the relationship and the question's specific topic.

**Agrees**

**Disagrees**

**Qualifies**
agrees, but adds a limit

**Explains**
something in Text 1

WORKED EXAMPLE

# Bike lanes and traffic

**TEXT 1**

Many urban planners argue that adding bike lanes reduces car traffic, since people who feel safe cycling will leave their cars at home.

**TEXT 2**

A study of five cities found that new bike lanes increased cycling, but car traffic fell only where lanes connected to transit stations. Isolated lanes mostly drew people who had previously walked.

**Based on the texts, how would the author of Text 2 most likely respond to the planners in Text 1?**

**A** By agreeing that bike lanes always reduce car traffic

**B** By arguing that bike lanes reduce car traffic only under certain conditions

**C** By claiming that bike lanes discourage cycling

**D** By suggesting that cities should stop building bike lanes

ANSWER AND EXPLANATION

# The answer is B

**TEXT 1 CLAIM**
Bike lanes reduce car traffic.

**TEXT 2 CLAIM**
Lanes raise cycling, but cut traffic only near transit.

**RELATIONSHIP** **Qualifies**

Text 2 agrees cycling rises but **adds a limit** to the traffic benefit. B names that limit: “only under certain conditions.”

## Why the others are wrong

**A** Ignores the limit; “always” is exactly what Text 2 disputes.

**C** Contradicts Text 2, which says cycling increased.

**D** Goes too far. Text 2 never says to stop building.

WATCH OUT

# Common traps

TRAP 1

## Total disagreement

Choosing “disagrees” when Text 2 only qualifies Text 1.

TRAP 2

## One-text answers

Answering from one text without checking the other.

TRAP 3

## Extreme responses

Words like “abandon” or “always” that neither author supports.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 4 paired-passage sets

Fill in a two-column chart (Text 1 claim, Text 2 claim) and circle the relationship before answering.

INDEPENDENT · TIMED

### 5–6 Cross-Text + 3 structure items

Structure questions from Lesson 2.2 are mixed in for review.

EXIT TICKET

### One pair of texts

Write the two one-sentence claims and the relationship word.

CATEGORY 3 · EXPRESSION OF IDEAS

*Lesson 3.1*

# Rhetorical Synthesis

**Weeks 9–10**
Turning a student's bullet-point notes into one sentence that meets a stated goal

## You will be able to

1. Find and underline the goal in the question stem before reading the notes.
2. Eliminate choices that are accurate to the notes but miss the goal.
3. Answer a synthesis question in under 60 seconds.

THE BIG IDEA

# The notes are raw material. *The goal* decides the answer.

These questions are formulaic and high-return. Often you can answer correctly without reading every bullet.

STRATEGY

# Goal, Then Match

1

### Skip the notes

Read the question first and underline the goal: “emphasize a difference,” “present the conclusion.”

2

### Make a checklist

“Emphasize a difference” needs two things and a contrast word. “Unfamiliar audience” needs an explanation of who or what.

3

### Eliminate

Cut any choice that fails the checklist, even if it is true.

4

### Notes last

Only check the notes if two choices survive.

WORKED EXAMPLE

# Two “great” structures

**A STUDENT'S NOTES**

- The Great Wall of China is about 21,000 km long, including all branches.
- The Great Barrier Reef is about 2,300 km long.
- The Great Wall was built by people over many centuries.
- The Great Barrier Reef was built by coral polyps over millions of years.

**The student wants to emphasize a difference in how the two structures were formed. Which choice most effectively uses relevant information from the notes to accomplish this goal?**

**A** The Great Wall of China is about 21,000 km long, while the Great Barrier Reef is about 2,300 km long.

**B** Both the Great Wall and the Great Barrier Reef are very long structures.

**C** While the Great Wall was built by people over centuries, the Great Barrier Reef was built by coral polyps over millions of years.

**D** The Great Barrier Reef was built by coral polyps.

ANSWER AND EXPLANATION

# The answer is C

### Goal checklist: a difference in *how they were formed*

- ✓ Mentions both structures
- ✓ Uses a contrast word (“While”)
- ✓ Contrasts builders and timescales

Only **C** passes every item on the checklist.

### Why the others are wrong

**A** A difference, but in *length*, not formation.

**B** A similarity, not a difference.

**D** Mentions only one structure.

WATCH OUT

# Common traps

TRAP 1 · MOST COMMON

## True but off-goal

Accurate to the notes, but it doesn't do what the question asks.

TRAP 2

## Half the goal

Mentions both items but doesn't actually contrast them.

TRAP 3

## Reading notes first

Working through every bullet before you know the goal wastes time.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 6 synthesis items aloud

For each, read only the goal and say the checklist before anyone reads the choices.

INDEPENDENT · SPEED DRILL

### 10 questions in 10 minutes

Review each miss: **“Which checklist item did the wrong choice fail?”**

EXIT TICKET

### Two synthesis questions

Under a 2-minute timer.

CATEGORY 3 · EXPRESSION OF IDEAS

*Lesson 3.2*

# Transitions

**Weeks 9–10**
Choosing the transition that expresses the logical relationship between sentences

## You will be able to

1. Name the relationship between two sentences before looking at the choices.
2. Sort transition words into relationship groups.
3. Eliminate choices that share a relationship: if two mean the same thing, neither is likely correct.

THE BIG IDEA

# A transition question is a *logic* question.

**1 · COVER**

Cover the blank. Read the sentence before *and* the sentence after.

**2 · CONNECT**

Describe the link in your own words: “the second is the result of the first.”

**3 · CHOOSE**

Pick from that row of the transition word bank.

REFERENCE

# Transition word bank

| Relationship | Transitions |
| --- | --- |
| **Contrast** | however, nevertheless, by contrast, on the other hand, still |
| **Cause and effect** | therefore, consequently, as a result, thus, hence |
| **Addition** | moreover, furthermore, in addition, likewise, similarly |
| **Example** | for example, for instance, specifically |
| **Sequence** | first, then, subsequently, finally, meanwhile |
| **Emphasis or clarification** | in fact, indeed, that is, in other words |
| **Concession** | admittedly, granted, of course |

WORKED EXAMPLE

# The new subway line

The city expected its new subway line to ease traffic on Main Street. _____, rush-hour congestion there increased by 12% in the year after the line opened.

**Which choice completes the text with the most logical transition?**

**A** Similarly

**B** For example

**C** However

**D** Therefore

ANSWER AND EXPLANATION

# The answer is C

**C** **However** · contrast

The city **expected** less traffic; congestion **increased**. The second sentence is the opposite of what was expected, so the relationship is **contrast**.

## Why the others are wrong

**A** “Similarly” signals agreement.

**B** “For example” signals an example.

**D** “Therefore” makes the increase a predictable result of the subway, which reverses the logic.

WATCH OUT

# Common traps

TRAP 1

## Choosing by sound

Picking what “sounds right” instead of naming the logic.

TRAP 2

## Half the context

Reading only the sentence with the blank and missing the sentence before it.

TRAP 3

## Synonym pairs

If “therefore” and “thus” both appear, the answer is probably neither.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### Card sort + 6 questions

Sort 20 transition cards into the word-bank rows, then work 6 questions, naming the relationship each time.

INDEPENDENT · TIMED

### 10 questions + a rewrite

Then fix a paragraph where three transitions are wrong.

EXIT TICKET

### Two transition questions

For each, write the relationship word from the word bank.

CATEGORY 3 · EXPRESSION OF IDEAS

*Lesson 3.3*

# Effective Language Use and Conciseness

**Weeks 9–10**
Precise word choice · Eliminating redundancy and wordiness

## You will be able to

1. Spot redundant phrases like “past history” and “each and every.”
2. Choose the shortest option that keeps the full meaning and is grammatically correct.
3. Choose the most precise word for a context.

THE BIG IDEA

# Shortest wins, *but only* if no meaning is lost and the sentence stays correct.

When the choices differ mainly in length, the SAT rewards the shortest version that still says everything needed.

STRATEGY

# Trim and Test

1

### Spot it

Do the choices mostly differ in length? Then it's a conciseness question.

2

### Start shortest

Does the shortest choice keep the meaning and the grammar? If yes, pick it.

3

### Move up

If not, test the next shortest, and so on.

4

### Hunt repeats

Watch for words that repeat an idea already in the sentence.

REFERENCE

# Redundancies to cut

| | | |
|---|---|---|
| return back → **return** | final outcome → **outcome** | completely finished → **finished** |
| basic fundamentals → **fundamentals** | advance planning → **planning** | revert back → **revert** |
| past history → **history** | each and every → **each** | reason is because → **reason is that** |

The **highlighted words** repeat an idea the other word already carries.

WORKED EXAMPLE

# The library hours vote

The vote on the new library hours was unanimous: _____ the proposal.

**Which choice completes the text most effectively?**

**A** every single member, with no exceptions at all, supported

**B** all of the members, each one of them, supported

**C** every member supported

**D** every member supported, fully and completely,

ANSWER AND EXPLANATION

# The answer is C

**C** every member supported

**“Unanimous”** already means everyone agreed. C is the shortest choice that keeps the meaning and completes the sentence correctly.

## Why the others are wrong

**A** “with no exceptions at all” repeats “unanimous.”

**B** “each one of them” repeats “all of the members.”

**D** “fully and completely” adds nothing new.

WATCH OUT

# Common traps

TRAP 1

## Too short

A choice that drops needed information or creates a fragment.

TRAP 2

## Fancy over precise

A longer, impressive-sounding word that doesn't fit the context.

TRAP 3

## Hidden repeats

A word in the choice that repeats an idea from earlier in the sentence.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 6 conciseness and precision items

For each wrong choice, circle the redundant words.

INDEPENDENT · REVISION WORKSHOP

### Cut 30 words from 150

Edit the paragraph without losing meaning, then complete 6 timed multiple-choice items.

EXIT TICKET

### One question + one rewrite

Answer one conciseness question and rewrite one redundant phrase.

CATEGORY 4 · STANDARD ENGLISH CONVENTIONS

*Lesson 4.1*

# Sentence Structure

**Weeks 11–12**
Sentence boundaries (run-ons, fragments, comma splices) · Subordination and coordination · Punctuation

## You will be able to

1. Tell an independent clause from a dependent clause.
2. Join or separate clauses correctly with periods, semicolons, colons, commas + FANBOYS, and dashes.
3. Punctuate nonessential elements and lists correctly.

THE BIG IDEA · THE SPLIT TEST

# Is there a complete sentence on *each side* of the punctuation?

Put your finger on the punctuation in each choice. Complete sentence on the left? On the right? Then check the rules.

**INDEPENDENT CLAUSE**

Has a subject and verb and can stand alone as a sentence.

**DEPENDENT CLAUSE**

Can't stand alone; often starts with because, although, which, when.

REFERENCE

# Punctuation rules

| Punctuation | What must be on each side |
|---|---|
| **Period or semicolon** | A complete sentence on both sides |
| **Comma + FANBOYS** (for, and, nor, but, or, yet, so) | A complete sentence on both sides |
| **Comma alone** | Never joins two complete sentences (that's a **comma splice**) |
| **Colon** | A complete sentence before; a list, explanation, or example after |
| **Pair of commas, dashes, or parentheses** | Removable extra information; the pair must match (comma with comma, dash with dash) |
| **No punctuation** | Between a subject and its verb, or a verb and its object |

WORKED EXAMPLE

# The museum exhibit

The museum's newest exhibit features over 200 artifacts from ancient _____ many of them have never been displayed in public before.

**Which choice completes the text so that it conforms to the conventions of Standard English?**

**A** Egypt,

**B** Egypt;

**C** Egypt, and,

**D** Egypt

ANSWER AND EXPLANATION

# The answer is B

### Split Test

**LEFT ✓ COMPLETE**
The museum's newest exhibit features over 200 artifacts from ancient Egypt

;

**RIGHT ✓ COMPLETE**
many of them have never been displayed in public before.

Both sides are complete sentences, so they need a **semicolon** or a **comma + FANBOYS**.

### Why the others are wrong

**A** Comma splice: a comma alone can't join two sentences.

**C** Extra comma after “and.”

**D** Run-on: no punctuation between two sentences.

WATCH OUT

# Common traps

TRAP 1

## Comma splices

They often sound fine when read aloud. Run the Split Test anyway.

TRAP 2

## Mismatched pairs

A dash opens the extra information and a comma closes it.

TRAP 3

## Over-punctuating

A comma between a subject and its verb.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 8 boundary items

Apply the Split Test out loud. Includes a colon, a dash pair, and a “no punctuation needed” item.

INDEPENDENT · TIMED

### 12 questions + 5 from scratch

Then punctuate 5 sentences yourself, with no choices to lean on.

EXIT TICKET

### Three sentences

Label each as correct, run-on, or fragment, and fix the broken ones.

CATEGORY 4 · STANDARD ENGLISH CONVENTIONS

*Lesson 4.2*

# Agreement and Usage

**Weeks 13–14**
Subject-verb and pronoun-antecedent agreement · Pronoun clarity · Modifiers · Apostrophes

## You will be able to

1. Find the true subject of a verb when phrases come between them.
2. Match pronouns to their antecedents in number, and make sure each pronoun is clear.
3. Place modifiers next to what they describe.
4. Use apostrophes correctly for possessives and contractions.

THE BIG IDEA

# These rules are about *matching*.

Find what the word must match, then check that it matches.

FOUR QUICK RULES

# What must match what

### 1 · Subject–verb

Cross out prepositional phrases and nonessential clauses, then match the verb to what's left.

The box of old letters **is** in the attic.

### 2 · Pronoun–antecedent

Singular nouns take singular pronouns. Collective nouns (team, committee, company) are usually singular on the SAT.

The company announced **its** results. (not “their”)

### 3 · Modifiers

An opening descriptive phrase must describe the noun right after the comma.

Walking to school, **the student** saw a fox. (not “a fox was seen”)

### 4 · Apostrophes

**it's** = it is; **its** = possessive. Singular possessive is **-'s**; plural possessive is **-s'**.

the student's locker · the students' lockers

WORKED EXAMPLE

# The essay collection

The collection of essays, written by scientists from more than a dozen countries, _____ how climate research has changed since the 1970s.

**Which choice completes the text so that it conforms to the conventions of Standard English?**

**A** describe

**B** describes

**C** are describing

**D** have described

ANSWER AND EXPLANATION

# The answer is B

### Cross out the extras

> The **collection** [of essays, written by scientists from more than a dozen countries,] **describes** how climate research has changed…

The subject is **“collection,”** which is singular. Only B is singular. If you heard “essays” or “countries” next to the verb, you were pulled toward A, C, or D.

### Why the others are wrong

**A** “describe” is plural.

**C** “are describing” is plural.

**D** “have described” is plural.

WATCH OUT

# Common traps

TRAP 1

### Nearest noun

Matching the verb to the noun closest to it instead of the true subject.

TRAP 2

### “Their” for one group

Using “their” for a single company or team.

TRAP 3

### Dangling modifiers

They sound natural in speech but describe the wrong noun.

TRAP 4

### Apostrophe mix-ups

its vs. it's; the students' lockers vs. the student's locker.

PRACTICE

# Put it to work

GUIDED · TOGETHER

### 8 mixed items, two per rule

Name which of the four rules applies before you answer.

INDEPENDENT · TIMED

### 12 items, rising difficulty

Includes 3–4 boundary questions from Lesson 4.1 for review.

EXIT TICKET

### Four sentences, one error each

Name the rule broken and correct it.

UNIT 9 · INTEGRATION THREAD

# Mixed-Domain Practice

A repeatable weekly session that builds stamina and the ability to switch between question types quickly, which single-skill units can't teach.

**WEEKS 15–30**

One session a week

**WEEKS 23–30**

Full timed simulations take over

THE REAL TIMING

**27**

questions per Reading and Writing module

**32**

minutes to finish them

UNIT 9 GOALS

# You will be able to

1. Complete a 27-question module in 32 minutes.
2. Recognize each question's type within a few seconds and apply the matching strategy from Lessons 1.1–4.2.
3. Use a skip-and-return routine so no question costs more than 2 minutes.
4. Track your own error patterns and choose what to review.

EVERY WEEK · 60 MINUTES

# How a mixed-practice session runs

**5 min**

### Name that type

8 question stems flash up. Call out the domain and strategy: “Transitions, Cover, Connect, Choose.”

**32 min**

### Timed module

One mixed module of 27 questions, in the order the SAT uses.

**13 min**

### Error log

For every miss, record the type, the trap you fell for, and the strategy to use next time.

**10 min**

### Mini-reteach

A focused review of the single most-missed question type across the group.

**Module order:** Craft and Structure and Information and Ideas tend to come first; Conventions and Expression of Ideas come later.

PACING ROUTINE

# Spend time where it pays

**~70 s**
average per question

**30–45 s**
for grammar and transitions, which buys time for long passages

**2 min**
maximum on any single question

### First pass

Answer what you can. Flag anything taking over 90 seconds and move on.

### Second pass

Return to flagged items. **Never leave a blank**: there is no penalty for guessing.

STRATEGY REVIEW · 1 OF 2

# Reading questions at a glance

| Question type | Strategy | Key move |
|---|---|---|
| **1.1 Textual evidence and inference** | Predict, Prove, Pick | Underline the proof |
| **1.2 Vocabulary in context** | Cover, Fill, Match | Find the clue word |
| **1.3 Quantitative evidence** | Claim first, data second | “True” isn't enough |
| **2.1 Rhetorical word choice** | Swap Test | Name the function |
| **2.2 Text structure and purpose** | Label the Jobs | Match the verb |
| **2.3 Cross-text connections** | Two Sentences, One Relationship | Agrees, disagrees, qualifies? |

STRATEGY REVIEW · 2 OF 2

# Writing questions at a glance

| Question type | Strategy | Key move |
|---|---|---|
| **3.1 Rhetorical synthesis** | Goal, Then Match | Turn the goal into a checklist |
| **3.2 Transitions** | Cover, Connect, Choose | Name the relationship |
| **3.3 Conciseness and precision** | Trim and Test | Shortest that's still complete |
| **4.1 Sentence boundaries** | Split Test | Complete sentence on each side? |
| **4.2 Agreement and usage** | Find the match | Cross out the extras |

KEEP PRACTICING

# Where to practice
